

Is there any course which you would like to add to this programme?

9 responses

A second course on Topology in which students can be introduced to the preliminary concepts in Algebraic topology. And then an elective with a rigorous study of Algebraic topology from the book by Allen Hatcher.

Several Variable calculus

Courses on Machine learning and Artificial Intelligence are planning to add.

Short term training programs

No

Computational Algebra

Add on courses for skill orientation

Nil

Number theorv. Algebraic topology

Anything else that you would like to add
